

# MS880

Mammography Viewer

# MS880

## Mammography Viewer

**Three years of films at once.** The MS880A single-belt viewer is wide enough to present twelve 24 x 30 cm mammography films concurrently. Thus, the radiologist can comfortably view three years of film without ever changing belt frames.

**At your fingertips.** The control panel includes Next and Prior buttons to ensure the radiologist can efficiently screen films.

**Accessories and Options.** Auto Select, Belt Advance Foot Switch, Pivot or Fixed Instrument Mounting Arm, and Film Jacket File.

### Specifications

|                              |   |
|------------------------------|---|
| Product Number               | 08-00987  |
| Peak Luminance               | 7,000 Nit   |
| Color Temperature            | 6,500 K   |
| Lamps                        | 6 Daylight fluorescent lamps per light panel (2 panels) |
| Maximum Heat Output          | 3,600 BTU/hr  |
| Fluorescent Dimming          | 5 Positions   |
| Film Capacity (Standard)     | 780-24 x 30 cm  |
| Film Belt                    | 1 Dual-tier, horizontal; 65 frames                      |
