

“You’ll like what you see with our new Philips Brilliance 40 - slice CT scanner.”

Brilliance CT helps to deliver definitive results in less time.

Philips Brilliance
40-slice CT scanner
At Brooks Memorial Hospital

- Unmatched technology platform offers a wide range of routine and advanced procedures, including cardiovascular, oncology, pulmonary, neuro, stroke assessment, orthopedics, and pediatrics.
- Detailed image information displayed in the most appropriate format, including 3D, to speed diagnosis and enhance treatment and surgical planning.
- Crisp, clear, fast images mean relevant information gets to referring physicians faster, in a more flexible and useful format.
- 440 lb. table weight capacity to accommodate larger patients.
- Acquiring thinner slices improves the accuracy of the data for greater diagnostic confidence, enhancing your ability to catch disease earlier and deliver the best patient care across a broad range of applications.
- Greater anatomical coverage in a very short time means short breath holds, a key factor for some older individuals or patients in distress.
- Philips DoseWise technology automatically delivers the finest image quality at the lowest dose.
